

Mathematics

(A Level, AQA)

This is a linear two-year course covering Pure Mathematics, Mechanics and Statistics, thus giving all students a good grounding in a variety of Mathematical areas. The course emphasises understanding and application of new theory. The final examinations consist entirely of problems to solve, rather than reproduction of lesson notes. So, although you will undoubtedly make notes as you progress through the two year course, the most important aspect of your studies will be practising solving problems and applying the theory covered. To be successful, you must have, or develop, a willingness to tackle questions and become involved with the work. Good students regularly use their private study periods to see staff for one-to-one consultation and this practice is actively encouraged.

Entry Requirements:

Grade 6 in GCSE Maths.

Course Content

Exams	%	When?	Content
Paper 1: Pure Mathematics (2 hours)	33%	June of Year 13	Includes all aspects of pure mathematics, including proof, algebra and functions, sequences, trigonometry, exponentials and logs, calculus and numerical methods.
Paper 2: Pure and mechanics (2 hours)	33%	June of Year 13	Includes all content from paper 1 plus mechanics content (vectors, kinematics, forces, Newton's laws, moments)
Paper 3: Pure and statistics (2 hours)	33%	June of Year 13	Includes all content from paper1 plus statistics content (statistical sampling, data presentation, probability, distributions, hypothesis testing)

Costs associated with this course

Claswiz calculator fx-991CW - £20 and an online textbook at a cost of approximately £10 for the two years.

Career Links

An A Level in Mathematics is highly regarded by the majority of employers and universities, precisely because of the demands it makes and the skills it develops. Mathematics is a requirement for certain degree qualifications such as Engineering, Physics and Statistics, and is also useful for those interested in apprenticeships in Accounting, Engineering and Technology. An A Level in Maths can lead to a wide variety of careers, for example as an actuary, business analyst, software engineer, technology analyst, information engineer, air traffic controller to name but a few.
